

nery was largely used on those jobs, and perhaps indirectly I made my contribution.

Again one opportunity led to another. I decided on another move to make my Philosophy all the more available to industry. I would prepare a film about it—and this caused a move to Los Angeles, hub of the motion picture industry.

I had not forgotten that wonderful woman in South Carolina. She had not forgotten me. The day before I left for the West Coast, she became my wife. She is also my secretary, my priceless business associate, and the most important member of my Master Mind group. We have now delighted in more than twenty years of this perfect partnership. Talk about compensation!

"Every act rewards itself." That is Emerson speaking. We shall visit with him soon. You realize, I am sure, that the *reward* of any act may not be a "reward" as such, but rather a *penalty* if that is what the act deserves. The act rewards *itself*, not you, in the sense that is meant here, and so the "reward" is fitting.

This, you may say, is nothing but old-fashioned morality. Indeed it is. It is modern morality as well, valid when man invented the wheel, valid when, perhaps, man will invent the means to duplicate himself in a test tube. And it is more than morality. I have shown you the Law of Compensation at work in my life in the hope that you will stop and think of ways it has worked for you. You will see these ways as manifestations of cause and effect. You performed some action and that "got the ball rolling." But can it be an accident that thousands of years of commentary refer to the fact that the act of giving invariably precedes the act of receiving? That when we "cast bread upon the waters" it *does* come back?

We see the Law of Compensation as it brings us a better job, a sum of money, an opportunity to fulfill ourselves, a meeting with someone who turns out to be a lifelong partner in love—and there is much we do not see. Unseen, silent forces influence us constantly. Some are good for us, some are harmful. This volume speaks on many pages of the solid, bread-and-butter aspects of life; but it speaks as well of the unseen and the omnipresent. As I show you how to be rich with peace of mind I also show you how to choose the friendly, invisible forces rather than the unfriendly, and how to make the favorable forces your allies.
