

forces of gravitation that handled it when it teemed with animals, plants and humanity.

Ultimately, nothing matters in nature.

Ponder this and you will begin to feel the cosmos as it should be felt—neither threatening nor promising. If there is a Heaven somewhere out yonder, I say again that you cannot prove or disprove it; the wisest man alive today cannot prove or disprove it; the wisest man who ever lived could not prove or disprove it. You are far, far better off—and so are your fellow men—if you believe with Emerson that compensation, retribution, punishment, reward, the balancing of accounts and the paying of debts—come in *this* world.

Hubbard and Rockefeller. When I think of Elbert Hubbard, often I think of John D. Rockefeller, Sr. They were so different!

Once Rockefeller asked me if I would like to change places with him. I told him politely that I would not; that I valued my health and my freedom, neither of which he enjoyed. I doubt if my remarks had anything to do with the obvious change which came over him a good many years before he died. But that change did come, and I see it as a new start in his life. Yes, the man who had billions found something lacking and attempted to make a new start in life.

What did he really want? By checking with those who knew him, I firmly believe that he wanted nothing more than what he had missed in his fabulous money-making career—peace of mind. I think that one day he looked at his money and it occurred to him that **ULTIMATELY, NOTHING MATTERS**. Ivy Lee's association with the Rockefeller interests was part of an effort to present to the world another side of the Rockefeller, Sr. nature. When the Rockefeller money began to flow into scientific, health and cultural projects, it signaled a kind of rebirth.

Elbert Hubbard never needed to change the image he presented to the world and himself. But Rockefeller, Sr. did, and so did Henry Ford, and so did many another man who seemed to be 100 percent successful—until he found that something was definitely lacking, nevertheless.

It is interesting to note that John D.'s descendants seem to have developed many useful social characteristics which simply were not popular among rich men in John D.'s day. Now I see that a great-grandson is occupied with social work—not merely through his money, but right down there where the
