

but it can help you remember. There is an old story about a missionary who spread the Word among the primitive inhabitants of a South Sea island. Among other things he taught them his version of the Golden Rule, which is the general version: *Do unto others as you would have them do unto you.* The chief of the tribe was greatly impressed. One day he knocked at the missionary's door and announced he had brought the missionary a present . . . six extra wives!

Apply the lesson seriously and you will see that the real goodness of giving lies in giving the other fellow what *he* needs.

It is this kind of giving which so fully accords with the Law of Compensation, and which accords with so much plain human experience that shows giving comes before receiving—when the giving really fills a need.

There is no point in repeating the many examples of such giving I have shown you in this book. If you will check back on a few such examples you will see the Golden Rule in action. Also you will see its connection with another famous saying from the Bible: *Whatsoever a man soweth that shall he also reap.*

We should not content ourselves with the merest crumbs from life's table, and we should not attempt to grab too much. The Golden Rule often seems to act as a great leveler in assuring that this shall be so. It creates an ever-present spirit of kindly consideration for the needs and rights of others, so that without thought of gain (which so often is twisted by small minds into *grabbing*) the mind infused with the Golden Rule acquires a sense of what constitutes its own true ability to give. Giving begets receiving; there is a to-and-fro passage of wealth which may not reflect itself in a swollen bank account, but does reflect itself in a mind which has known such wealth. In this lies happiness, peace and health which a man merely rich in money may never know.

A suggestion: Look around in your community and find some man who you know lives for the purpose of accumulating money. Find some man—and alas, you can find such men—for whom any amount of money is too little and no amount is too much. He will almost certainly be a man who has little conscience about how he acquires his money, for conscience can be a hindrance when your horizon is nothing but a line of empty money bags to be filled.

Observe this man. Look for warmth in his soul; you will not find it, unless the subject of discussion is money. Watch
