

little and not too much, but that great wealth will nevertheless pass through your hands. Nobody who lives only to accumulate money can know happiness, and there is no real success unless one is successful in being happy.

The Magic Power of Belief

In the power of belief lies the Supreme Secret. Belief is the key to basic mind-power which turns concepts into realities. Goals can be attained in ways which seem miraculous, yet we use only natural forces available to everyone. Even physical changes in the body can be caused by deeply implanted belief. The key to having quantities of money often lies in a simple process of auto-suggestion. Concentrate on precisely what you want, and you will see signposts that point the way. The forces of human evolution now have been brought under human control, and you can control your own evolution as a better, more successful person.

ANYTHING the human mind can believe, the human mind can achieve.

Please read that again, slowly: Anything the human mind can believe, the human mind can achieve.

If you had been presented with that statement at the beginning of this book, you might have found it a bit too much to digest all at once.

By now, however, you have seen many of the patterns of success and failure, of happiness and unhappiness, of mind-turmoil and peace of mind which man gives to himself.

Now, when you read: *Anything the human mind can believe, the human mind can achieve*, you know that the conception of achievement, which turns into the achievement itself, is our great human prerogative.

Anything the human mind can believe, the human mind can achieve. That is the Supreme Secret.

Truly, deeply believe you will have great wealth, and you will have it.
