

and still achieve your goal. When your mind can truly picture a desired goal, and feel success consciousness driving it toward that goal, you can win that goal. Let us put aside all other matters and investigate your state of mind."

Actually the young man was very close to having the desired positive state of mind. I waited till I was sure he had it, however. Then I said he was a good risk, and I gave him the use of our guest room, and his meals. I let him use my charge account at Marshall Field's so that he could be well dressed. I guaranteed his note for his first outfit of cookware.

During his first week he cleared nearly one hundred dollars in profit. The second week he doubled that amount. In a little while he began to train other men and women, whom he managed. Most of all, he instilled in them the success consciousness which now had full hold of his mind, and as they prospered, so did he.

At the end of four years, the young man who had been so hungry and broken-spirited, so very far from being a millionaire, was worth more than four million dollars. Moreover, his newly keen and efficient mind had perfected a home-demonstration selling plan which now nets millions of dollars annually to a large corps of salespeople.

When the bells of heaven ring with joy. When a man finds his own mind and fills it with successful consciousness, or when another man helps him do so, I fancy that the bells of heaven ring with joy. Here is one more soul who has broken the chains forged by his fearful imagination.

Now you can see why I chose to begin this book by revealing what it means to take possession of your own mind, live your own life, find your real self that has no limitations. When you do this you have an asset worth *whatever values you choose to make it worth*.

Think again of what is involved in creating an independent nation. Think of ancient India with its teeming millions, under British rule for generation after generation. Think of the Mahatma Gandhi, a man who had no money, controlled no army, did not own a house, did not even own a pair of pants. Yet he had an asset which was greater than all the might of the British Empire—the capacity to take possession of his own mind and direct it toward purposes of his own choosing. He chose to free India, and he lived to see the achievement of his purpose.

Thanks to the influence of Mahatma Gandhi, my Science
