

sociated with him, the gang believed I too had had something to do with their exposure. I missed assassination by only a few hours.

For a year I had to hide. At length the murderers were caught, convicted and given lifetime sentences in prison. Meanwhile Judge Gary had died. All my plans were upset, I had had to waste much precious time while in hiding, and I had no publisher. I was right back where I had started—or rather, I was behind where I had been.

I made a new start and found a publisher for my writings. That is a story in itself, but it is not the point of *this* story.

I found out later that if Judge Gary had become my financial backer, and if *The Science of Personal Achievement* had been distributed within the United States Steel Corporation as had been planned, I would forever after have been looked upon as a tool of Big Business. *The Science of Personal Achievement* would have been greeted with suspicion, would have been turned down cold by many of those whom it now serves. Furthermore, I might have been inhibited against making statements I have made from time to time against Big Business when it forgets its real purpose, which is to build a better world for mankind.

**Every adversity has within it the seed of an equivalent or a greater benefit.** Can you remember that? Write it on a card. Carry the card in your pocket and read it daily! In that phrase lies the key to many a man's peace of mind. It is not the Supreme Secret to which I have referred but it lives on the same street. Set it firmly into your consciousness: *Every adversity has within it the seed of an equivalent or a greater benefit.*

Thus it is possible, and strongly advisable, to CLOSE THE DOORS TO YOUR PAST insofar as any regrets or bitterness or post-mortems are concerned. You are searching for wealth and peace of mind. Neither the way to wealth nor the way to peace of mind leads through the graveyard of unpleasant experiences long past.

When you have attained peace of mind, your mind will automatically reject every thought and every mental reaction which is not beneficial to your welfare. Meanwhile, help yourself attain this great command-of-mind and, all it can do for you. Avoid all negative mental influences and especially avoid that shadow of mournful regret which can keep all the sunshine out of your life—and keep out other gold as well.
