

slaves to the bankbook, too many slaves to convention and to self-consciousness. Before you say *I am free*, see if you answer *yes* to these questions:

When circumstances require me to use my time in a way I did not plan to use it, do I, in that time, know my own mind and use it beneficially?

Have I set up my work schedule so that I need not live in fear of work overwhelming me and stealing my hours of rest?

When I find a way to express myself, and know it is socially acceptable, do I continue to express myself in that manner even though others may think it strange?

Have I freed myself of any family or regional or cultural custom which has hampered my career or my personal life?

Am I willing to question the ways in which other people do things, and never make an absolute guide out of "That's the way it is done"?

Do I realize I am not working for money, but for that which money can buy?

If you honestly answer *Yes* to all these questions, you are essentially a free person and you do not fear the loss of freedom; you know that freedom cannot be taken away from the soul.

Notice the last question especially. When I became aware of the drives which enable men to make great fortunes, I also became aware that some rich men do not have peace of mind. An appreciation of money is a far cry from the worship of money, which in the end destroys happiness. Remember, this book shows you how to grow rich *and* have peace of mind.

Liberty extends in many directions. Those who fear slavery are the ones who have made themselves slaves, for they have conditioned themselves to it and they know how defenseless they have become. *Cast out fear of loss of liberty and drive ahead.*

6. Fear of old age. "I used to be a good amateur shortstop," mourns a man of seventy-five, "and now I couldn't stop a grounder that was rolling more than one mile an hour."

Such remarks are typical of those who fear old age and so cannot know peace of mind in the years which should be most rewarding. Old age is a handicap, yes, but only in connection with certain types of physical motion. Nature never
