

was published I have been able to talk to some of these people, and I see that some have used the book to help them become truly rich. But some have used it to help them become rich in money only. It is time to set down once more the twelve great riches of life:

1. A positive mental attitude
2. Sound physical health
3. Harmony in human relationships
4. Freedom from all forms of fear
5. The hope of future achievement
6. The capacity for faith
7. A willingness to share one's blessings
8. A labor of love as an occupation
9. An open mind on all subjects
10. Self-discipline in all circumstances
11. The capacity to understand others
12. Sufficient money

These are the riches which can and should go along with peace of mind. Notice I have set money in the last place, and this despite my insisting that it is very difficult to have peace of mind without sufficient money. I set it there because you yourself will automatically give emphasis to money. Now and then, therefore, I must remind you to de-emphasize it and remember this: Money will buy a great deal but it will not buy peace of mind—it only will help you find peace of mind. But neither money nor anything else can help you find peace of mind unless you begin the journey from within yourself.

Basic steps in building your income. I have been told that it is not good logic to warn people of the dangers of misusing money, when probably they do not have enough money to make them worry about misusing it. I would follow this advice if I were writing a book merely about how to earn money. This book also is concerned with showing you where you are going and how the world looks when you get there. It helps you build correct attitudes right at the start.

As long as we have pointed firmly at those attitudes, however—as we shall point again—I shall set down some practical ways in which a person who has little or no capital can begin to build his wealth. Each of these ways is specific unto itself, so to speak, but is capable of almost infinite modification. It is up to you to pause as you read and apply these procedures to yourself, your talents, your surroundings and, above all, your goals.
