

confident faith in himself, instead of straining for many times more than he can spend, he often earns much more than he expected. No father benefits his son when he surrounds him with money and prevents him from learning life's great lessons through honest work. Keep your mind on all twelve of the great riches of life, and know that your journey toward riches must begin within yourself.

Basic steps in building your income

One way to build income is to show others how they can help you succeed by advancing their own success. Another way is to show someone how he can get more for his money. Another is to bring producer and consumer together, which can be done in many ways. Always, some of the money you earn should stay with you. Debts can rob you of peace of mind. Saving is a habit which gives you many benefits besides money in the bank.

How to start yourself in the saving habit

Almost anyone who is short of money can stop the drain of small, unnecessary spending. Doing this, you often find better and more interesting ways to enjoy life. You can live as well as before because you augment your ability to handle money. The ability to save is a good index of character, and employers know it. Make a list of every cent you spend on certain items, and you will open your eyes to the total you spend—a total which can be saved toward purchases which hitherto have seemed beyond your means, or kept as a means of taking advantage of low prices or investment opportunities.

The Blessed Art of Sharing Your Riches

Wealth that is shared creates more wealth, and you can share many forms of wealth besides money. Today's millionaires themselves point out that anyone can become a millionaire because today's wealth is so wide-spread and gives rise to so many opportunities. When you share in your own home you
