

## MOVEMENT OF LABOR

Globalization evolved through international trade, which relies on goods moving freely between countries. While this has become more widespread, the same isn't true of the movement of labor, allowing people to move from one country to another to work. Many countries restrict immigration to protect jobs for their workforce, but others argue that immigrant labor is vital to the economy.

**The Dutch East India Company, established in 1602, is considered the first modern multinational corporation.**
