

**THE LOVE OF
MONEY IS THE ROOT
OF ALL EVIL.**

KING JAMES BIBLE

Lasting value

There is a third important function of money. It is a way of saving for the future, or as economists call it a “store of value.” When we go to work, we get paid for what we do. If there were no money, we might be paid with things such as food or other necessities. However, if we receive a paycheck of money—or money is put into a bank account—it can be used to buy our food, clothes, and pay our bills; it can be used for many different things. If there is money left over after we have bought the things we need, it can be saved to be used later. There are other ways of storing value, for example, in artworks, property, or land, but money is far more flexible and easier to exchange. To be useful in this way, money must hold its value over time, so the money in our bank accounts can be used in exchange when it is needed.
