

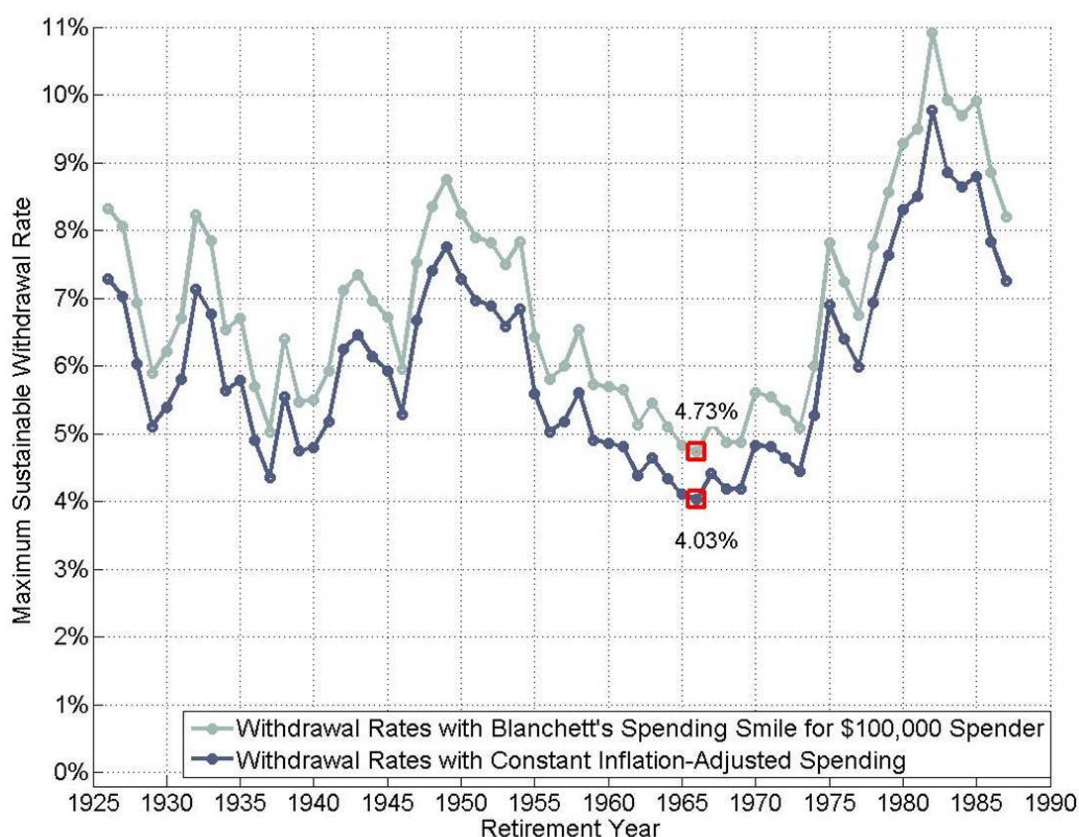

Exhibit 5.20

Maximum Sustainable Withdrawal Rates (MWRs)

Cases: (1) Blanchett's Retirement Spending Smile, (2) Constant Inflation-Adjusted Spending Strategy

For 50/50 Asset Allocation, 30-Year Retirement Duration, Inflation Adjustments

Using SBBI Data, 1926–2016, S&P 500 and Intermediate-Term Government Bonds

Age Banding

Another important contribution in the study of retirement spending patterns is Somnath Basu's 2005 article "Age Banding: A Model for Planning Retirement Needs," from the *Journal of Financial Counseling and Planning*. Though it provided a comprehensive retirement planning framework, I want
