Wholesale Cost for 30-Year Bond Ladder:								\$1,069,231
Initial Income Receipt as a Percentage of Cost:								3.74%
Internal Rate of Return:								0.76%

Source: Calculated with data from the *Wall Street Journal* Market Data Center.

These columns differ from the STRIPS ladder. In particular, we must make the distinction between real and nominal variables for TIPS trading in secondary markets. The ask price is in real terms. The accrued principal indicates how an original \$1,000 has adjusted for subsequent inflation since the TIPS was first issued. Accrued principal is the real value of the bond at
