

5. Provide the foundation that, along with the funded ratio that quantifies assets and liabilities, allows for the construction of your RIO-Map.

6. Identify potential gaps in your retirement income plan and suggest next steps to make sure you have a clear path ahead in terms of developing a unified strategy based on best practices for retirement income to meet your retirement goals and manage your retirement risks.

The RIO-Map also provides a documented plan to help survivors who may have less financial sophistication than the one generally in charge of the family finances.

While every map will be different in terms of the sizes and holdings within the different boxes, Exhibit 8.2 shows the general structure of the RIO-Map. We break the map down into four parts: (1) Your Goals, (2) Assets, (3) Income Funding Plan (the arrows), and (4) Liabilities.
