

Rich Author, Poor Readers

ROBERT KIYOSAKI IS the author of *Rich Dad, Poor Dad*.⁴⁹ It's one of the most popular personal finance books of all time, having sold 32 million copies. You would assume a guy like him must know a thing or two about investing. Instead, despite all of his personal success, Kiyosaki has morphed into a panicky *doomer*.⁵⁰

I was unaware of this until my colleague Ben Carlson pointed it out.⁵¹ He was wondering what Kiyosaki was up to, and found this from the *Rich Dad* author in December 2023:

FYI. Bank Credit just sold off like 2008. Get some cash out of banks as you need cash. This may be the start of the biggest crash in history.

Hope I am wrong yet no time to play Russian Roulette with your life.⁵²

Before you liquidate all of your assets and relocate to New Zealand, you may wish to consider Kiyosaki's track record. Three months after making that call, markets continued rallying; one year later, in December 2024, the S&P 500 was 30% higher than when that warning was tweeted.

"Wait a minute, I feel like I've heard this before," observed Carlson. On September 26, 2021, Kiyosaki issued a very similar market warning:

Giant stock market crash coming October. Why? Treasury and Fed short of T-bills. Gold, silver, Bitcoin may crash too. Cash best for picking up bargains after crash. Not selling gold, silver, Bitcoin, yet have lots of cash for life after stock market crash. Stocks dangerous. Careful.⁵³

The year 2022 was not a great one for equities or bonds, both falling double digits. But the 15% drop from that tweet to the October 2022 lows was hardly a disastrous market crash. For the *Rich Dad* author, it was merely one in a long line of warnings.

Before that was the October 2020 call:

The EVERYTHING CRASH is coming. Since 1987 world has been in
