

KEY TAKEAWAYS: CREDIT CARDS

- Credit cards can be extremely dangerous because of their high interest rates. Credit cards can come with interest rates over 30%!
- Pay your credit card off in full every month and you will never pay interest. If you can always pay your bill in full, credit cards actually pose no threats.
- Use your credit card like a debit card. If you do not have money in the bank to pay off the purchase, do not make that purchase.
- If you use a credit card effectively, it can be a great tool to help you build your credit. Paying your credit card each month and in full is a simple way to boost your credit score by proving that you are reliable.
- Do not open a credit card just for the rewards. While some of the rewards programs may sound appealing, the rewards generally depend on you spending money to get them.
- Avoid credit card debt at all costs.
