

2. A billing cycle is usually around 30 days. Your bill for a previous billing cycle is about three weeks after the billing cycle has ended. So if your billing cycle ends on June 30, your payment will probably be due around July 21.
3. If you pay off the full balance every month, you will never pay interest.
4. This question is a bit tricky. The amount owed is only \$500. Remember, you are only charged interest on the amount that you still owe after you have made your payment. If you pay your balance in full, and had no previous balance on the card from the month before, then you will not be charged any interest.

Build Your Skills: Taxes

1. A W-4 determines how much in taxes will be withheld from your paycheck; a W-2 tells you how much money you made and how much you paid in taxes during the calendar year for a single job; a 1040 is the form you use to file your taxes.
2. No. You can take the standard deduction and lower your taxable income significantly. As of 2020, the standard deduction is \$12,400, which would mean the taxable income on a \$60,000 salary is \$47,600.
3. You should never refuse a raise because if you do receive enough money to move you into a higher tax bracket, only the money you make in the new bracket will be taxed at the higher rate.
4. \$12,290. Here is how we arrive at this answer:
 - o \$9,875 of the salary will be taxed at 10% (\$987.50)
