

BUILD YOUR SKILLS: BUDGETING

Please answer the following questions. Answers can be found in the back of the book.

1. What are the three budget categories that people typically overspend the most in?
2. When you begin to make money and start budgeting, what is the most important thing to fund first?
3. If a person's take-home pay (after taxes) is \$3,500 per month, what is the most they should be spending on their housing?
4. If you are already working and receiving regular paychecks, download one of the budgeting apps and see how you are doing with your expenses. If you do not yet have a job, use the calculator at www.smartasset.com/taxes/paycheck-calculator to estimate what your future take-home pay may be, and then write out an appropriate budget for your projected salary.
