

among their subordinates or customers. Stockholders are entitled to somewhat more than an even break. Suppliers cannot be treated capriciously. Salaries and wages paid to workers should be fair and equitable; promotions should be made on the basis of merit. The psychological impact of unfairness is likely to be shattering to the individual; failure to be fair at all times means just that for management: failure.

Among other things, fairness to employees implies trust.

The feeling that he is not being trusted damages—and frequently destroys—employee morale and performance. No worker can be contented and productive if he senses that management distrusts his competence or distrusts him personally.

In his book ***The Naked Society***, Vance Packard quotes Yale University's Dr. Chris Argyris, whose researches into human behavior have shown that "one of the most powerful motivators of constructive human conduct is simple trust." Packard goes on to cite what Dr.

Argyris describes as a "causal chain" of mistrust that develops in some companies:

1. The employee comes into the organization with honest, earnest motives.

108

2. He experiences the frustration that comes from a feeling of failure because he is given little feeling that he is trusted and little responsibility.

3. He reacts by feeling less responsibility for the well-being and success of the organization. He also may gradually respond to his feeling of failure in a number of active ways, including stealing. Partly he steals because it is a safe way to express his aggression. In a deeper sense

"he steals from a company which has helped to alienate him from feeling responsibility, commitment and trust."
